

Lion's P.R.I.D.E. Mission

The mission of the Lion's P.R.I.D.E. Mentoring Program is to enhance the educational experience of Opportunity Youth, 3rd through 5th graders, by establishing supportive relationships and exposing them to authentic learning opportunities beyond the classroom.

Preparing Responsible Individuals Destined for Excellence

2016-17

Education through Exposure

One goal of the P.R.I.D.E. Mentoring program is to expose students to opportunities that will enhance their future outlook. Program coordinators will work with local colleges and universities to provide enriched learning experiences through exposure to college life and post-secondary learning.

Cultural Learning Opportunities

Students in the P.R.I.D.E. Mentoring group will be provided the opportunity to go on field trips that offer exposure to academic-related events. Such events will be planned based on the educational quality and practical, relevant teaching experience that serves to address the needs of the P.R.I.D.E. students.

Mentors are essential in helping students to develop good academic and social skills, understand how to navigate the world around them, and build up their self-confidence and self-esteem.

Many students involved in the P.R.I.D.E. group may not otherwise have the opportunity for an enhanced learning experience outside of school. It is our goal to provide students with the personal and emotional support they need in order to realize their academic potential.

Financial Literacy

The goal of the Lion's P.R.I.D.E. Mentoring Program is to also allow students to apply the concepts and standards that are taught through Common Core in the classroom by demonstrating math, reading, science, and social skills while operating our School Store and other Fundraising efforts. Students will be able to:

- * Practice counting money and ringing up purchases
- * Apply customer service/social skills with students, parents, and staff
- * Create a budget and work towards a year-end goal
- * Understand and apply problem-solving skills
- * Collaborate with fellow students on fundraising events
- * Become future business leaders and entrepreneurs
